

Manage Your Cable While Managing Your Budget.

Now, installers have access to the most feature rich cable management system in the industry... Introducing Cooper B-Line's RCM+. Offering simplified cable management, a more flexible solution for all installations and a reduced total installed cost. RCM+ has all the configurations you need for your rack supported cable management requirements.

Flexibility.

Need gates on the left, but fingers on the right? No problem. How about adding doors on the back? Again, no problem! The RCM+ open system design offers countless options and solutions to deal with issues of cable access and cable routing...like those that are created by increasing demands for faster data transmission and higher cable density. The RCM+ incorporates an innovative modular unit concept with total interchangeability of parts over all units. All rearrangement and modification of the cable management system is done easily in the field. Flexibility... based on your application needs now and in the future.

Affordability.

Our RCM+ cable managers offer all the features of higher priced systems, PLUS features that aren't offered on products priced at two, three and four times as much. Also, because of the way the RCM+ is designed, you will find significant labor savings, dramatically improved cable routing and access options... All part of a system that can be tailored to almost any need.

Install-ability.

No matter what your requirement is, RCM+ can be installed in whatever configuration you need, on whatever standard 2-post rack you have or want. The clean, simply designed appearance blends with the widest range of architecture and environments. If you require retrofitting a cable manager to an existing rack, or if you are looking to add additional racks and accessories, RCM+ will cure all of your cable management headaches.

U.S. and foreign patents pending

Vertical cable manager with closely-spaced fingers for high-density cabling.

Horizontal managers with removable door that hinges top or bottom, allows for easy cable access. Flips up, stays up.

Accessory mounting holes run the full length of all vertical sections to accommodate attachment of dozens of cable management accessories.

Universal doors work on all configurations of fingers and gates.

Double-hinged gates and doors can be used in combination. Both remain fully functional.

Snap on hinges allow quick opening from either side or complete removal of the doors and gates.

Compact folding door handles.

Vertical Cable Manager with widely spaced fingers for low-density cabling.

Back cover (optional accessory) available for all managers

Standard Finishes.

- Flat black aluminum
- Clear anodized aluminum
- Other colors available on special order
